

Miami Open Account Manager

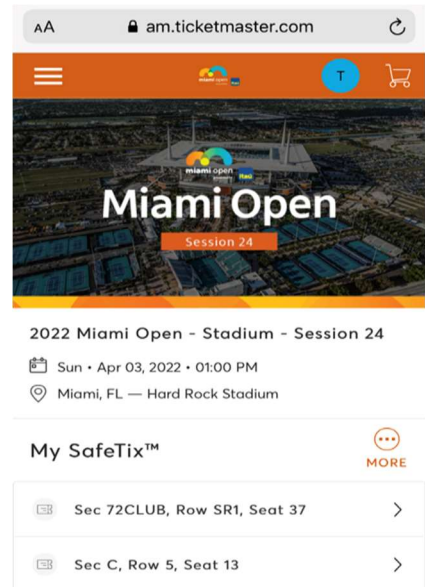

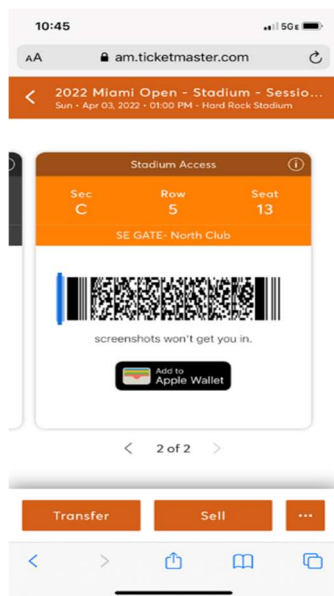

Viewing/Adding your Tickets to your Wallet Through the Miami Open Account Manager

Step 1: Visit <https://am.ticketmaster.com/miamiopen/>

Please Note: You must view your ticket from a mobile phone to view the barcode. An iPad or laptop computer will not generate a barcode.

If you are accessing your tickets abroad before arriving in Miami, you may have to turn off public Wi-Fi to sign in

Step 2: Select the session you would like to add to your wallet. You will have to add each session individually if you have multiple sessions.

Step 3: Click on the ticket you wish to add and select "Add to Apple Wallet" or "Google Pay" depending on your device. You can then add all tickets for a session, or just an individual ticket.

Step 4: If you have an Apple phone, your ticket can now be found in your **Wallet** application. If you have an Android phone, your ticket can now be found in your **GPay** application.

Please Note: If you have not set up an account in GPay, you will need to set one up prior to viewing your tickets. Your ticket can be found under **Passes**
